

# Next-Generation Medical Review Workflow Software

Submit, track and receive cases using the most advanced medical peer review portal on the market.

## Real-Time Transaction Workflows

Reduce the cost and time you spend sending, receiving and processing cases. PeerPoint's unique real-time workflow allows you to process cases through our secure web portal, resulting in faster, more accurate medical reviews.

## Flexible Submittal & Delivery

Cases can be sent and received electronically, via fax, or by courier, with PeerPoint's<sup>®</sup> user-specified submittal and delivery options. In addition, any accompanying physical materials (X-Rays, dental molds, etc) are easily handled using our integrated Artifact Tracking option.

## Simple Setup and Training

Quickly create confidential account profiles online and grant secure access to any number of specified users. It takes only a few minutes to set up, requires no desktop software or lengthy training, and is backed by our outstanding customer service.

## Digital Workflow Integration

With PeerPoint, completed reviews can be returned to you in electronic format, allowing you to easily attach them to electronic case records or paste review content straight into your claims management system, reducing storage, filing & transcription costs. *Contact us to find out more about integrating PeerPoint directly into your claims management system.*

## About AllMed Healthcare Management

PeerPoint is developed and maintained by AllMed Healthcare Management, a URAC-accredited independent review organization (IRO) that serves leading healthcare payer and provider organizations nationwide

AllMed's technology-based independent review services improve healthcare utilization, quality, and physician performance, while reducing unnecessary costs.

## PeerPoint 2.0 Key Features

### New Time-saving User Interface

The newly redesigned PeerPoint 2.0 interface greatly increases speed and usability through the use of modern UI elements such as tabbed navigation and integrated auto-fill functionality. Submit and receive cases faster and easier than ever.

### Upgraded Profile Manager

With PeerPoint 2.0 you now have more control over how you choose to receive your reviews. Create an unlimited number of profile contacts and have your completed cases sent to your home, your office, or wherever you need them most.

### Robust Application Architecture

PeerPoint is built on state-of-the-art Microsoft .NET technology by AllMed's own software engineering team, which has years of experience in building and deploying enterprise web applications. PeerPoint can be integrated with our clients' IT systems, including claims management, case management and utilization review software.

### Multi-Location Administration

PeerPoint 2.0 expands the notion of client administrator, allowing for two separate administration levels. Now you can create multiple locations for your company and assign unique administrator privileges for each location.

### Future Forward Platform

Our new, highly-extensible framework will allow us to implement upgrades faster and more frequently, as well as provide a robust and scalable platform from which we can expand and release innovative new medical review products and services.

### World-Class Data Security

PeerPoint uses enterprise-class security protocols to protect patient health information, ensuring HIPAA compliance at all stages of the review cycle. Our super-secure off-site data center provides advanced fire protection, fault tolerance and disaster recovery to ensure your member case data remains uncompromised.
